

Policy on Virtual Meetings

CAPE establish a general policy that membership meetings at all levels of the organization should be held virtually as the primary and preferred meeting format:

- a. As a cost-saving measure; and
- b. Significant flexibility be offered to the National Office to determine which meetings merit in-person presence for reasons of cultivating relationships and other possible benefits; and
- c. That in-person or hybrid meetings, where not approved by the National Office, must use existing local resources to cover associated meeting costs; and
- d. All official CAPE meetings at all levels of the organization must offer a virtual participation option, to accommodate all members and their respective needs; and
- e. Regional Councils, where they exist, will be supported by the National Office in delivering at most, one in-person hybrid meeting per calendar year. All subsequent regional council meetings in the same calendar year should either be virtual by design or supported through existing local resources.
